

Shivam Pandiya

PRODUCT MANAGER

Experienced Product Manager with diverse experience in blockchain and Web3 product development. Expertise in developing and executing product roadmaps, leading cross-functional teams to launch scalable dApps, and increasing user adoption in fast-paced environments. Proven ability to boost user adoption, improve product-market fit, and deliver high-impact Web3 solutions.

WORK EXPERIENCE

Antier Solutions

July 2021 - Present

Product Manager

- Defined and executed product roadmaps for multiple Web3 ecosystems, aligning business objectives with development goals and driving successful delivery in fast-paced environments.
- Led cross-functional teams to design, develop, and launch scalable Web3 applications.
- Conducted research for varied tokenomics and integrated blockchain protocols into multiple DeFi platforms.
- Collaborated with UX/UI teams to enhance user experience and onboarding flows for decentralized platforms.
- Directed the development and launch of several blockchains, achieving significant transaction volumes and key performance benchmarks.

5irechain Antier Affiliated

Oct 2022 - Aug 2023

Product Manager

- Directed the end-to-end development and successful launch of the layer 1 blockchain, achieving a record-breaking 50 million+ transactions.
- Managed project timelines, risks, and dependencies, ensuring seamless coordination between engineering and product teams.
- Led roadmap planning and sprint execution using Agile and Scrum methodologies.
- Coordinated cross-functional teams to ensure timely project releases and optimise ecosystem adoption.

Sanghvi Consultancy

Oct 2020 - Mar 2021

Research Analyst

- Analyzed and optimized agent and client databases, identifying opportunities for automation and efficiency improvements.
- Implemented SMM (Social Media Marketing) and SEO strategies for the organization's social network.
- Formulated a targeted plan to acquire new clients, resulting in a 4% increase in the client base.

Global Centre For Entrepreneurship And Commerce

Aug 2017 - July 2020

President - Tech Club

- Led the Tech Club at my college to start hackathon participation rate.
- Organized and hosted over 20 learning events and seminars such as power googling, IoT workshops, and hackathons.
- Managed content writing, digital marketing, video editing, and social media, effectively driving traffic to the institution's online profiles, including the website.

GB Social Media Promotions Internship

June 2018 - Aug 2018

Web Developer

- Developed and designed WordPress websites for a diverse clientele including politicians, NGOs, MSMEs, restaurants, and hotels.
- Moderated interactions and managed social media presence for politicians and MSMEs, ensuring effective communication strategies.

PROJECTS

 BlockDAG

Layer 1 DAG-based blockchain with EVM compatibility. It runs on the proof-of-work (PoW) algorithm that incentive users to mine BDAG coins to achieve security and decentralization.

[Whitepaper](#) [Mobile App Development](#) [ICO](#) [Mining Application Development](#) [Layer 1 Dev Documentation](#)

 Tomi

Tomi is a DePin-focused web3 ecosystem that offers a comprehensive decentralised ecosystem with true ownership, strong privacy, and revolutionary DePIN technology.

[DePin](#) [Developer Documentation](#) [Project Planning](#) [Testnet Launch](#) [Roadmap Planning](#)

 5irechain

5ireChain is a layer-1 EVM compatible blockchain along with WASM compatibility. It is the world's first sustainable blockchain. Over 50M+ Transactions on testnet.

[Research](#) [Agile](#) [DSM](#) [User Guides](#) [Smart Contract](#) [Tokenomics](#) [Testnet](#) [Demos](#) [USDC Integration](#)

 Shido

Shido is a Decentralized Layer 1 Blockchain focused on empowering the interoperability in crypto. Ecosystem - Shidoscan, mobile application, DEX, staking platform. Achieved over 10,000 TPS.

[Research](#) [SDLC](#) [FRD](#) [BRD](#) [Proposal](#) [Tokenomics](#) [Testnet](#)

 Hydro

Hydro enables publishers to monetise the "time spent" by users browsing on their platform, thereby reducing their dependence on ads. The Hydro ecosystem utilises the SUI blockchain for data recording and tracking.

SKILLS

- Team Management
- Problem-Solving
- Project Management
- Designing
- Leadership
- Negotiation
- Time Management
- Collaboration

TECHNICAL SKILLS

- JIRA, Scrum & Agile
- Quality Assurance
- Blockchain Protocols
- Content Writing
- MS Excel
- Documentation
- Smart Contracts
- Tokenomics

COURSES & CERTIFICATES

- NISM: Equity Derivatives
- NCC: Grade A
- Business Analysis - CCBA Endorsed
- Google Adwords

EDUCATION

Global Centre For Entrepreneurship And Commerce Bcom. Honors Entrepreneurship	2017-2020
Subodh Public School 12th (Senior Secondary)	2015-2016
Subodh Public School 10th (Secondary)	2014-2015

PORTFOLIO

Tomi DePin Ecosystem

- Led the product strategy and development of decentralized wallet and storage solution (tStorage).
- Conducted extensive market research & competitive analysis for product positioning.
- Managed project planning, roadmap definition, and testnet launch coordination.

Tech Stack: ReactJs GoLang IPFS Swagger Postgres

5ireChain Ecosystem

- Led the development of the Layer 1 blockchain, focusing on its unique sustainability-focused consensus mechanism.
- Developed functional flows for 5ireScan Explorer, Staking Dapp, Wallet Extension, and other ecosystem apps.
- Analyzed ESG regulatory requirements to ensure compliance.

5ireScan Explorer Staking Dapp Wallet Extension Cross- Chain Bridge Nominator Application

Tech Stack: NextJs NodeJs Redis RabbitMQ Postgres

BlockDAG X1 Application

BlockDag X1 miner is an mobile application that allows users to mine BDAG coins and participate in presale.

- Led the product management of BlockDAG's wallet integration and mining app, facilitating decentralized mining via mobile platforms and contributing to a \$20M+ presale for BDAG tokens.
- Developed the UX/UI design flows for the mobile application and blockchain explorer

Tech Stack: React Native NodeJs ROR ReactJs

Vine Labs Ecosystem

An scalable modular "Layer 0" protocol that acts as an incubator for metaverses and open world space supported supported with multiple app chains to improve scalability.

- Facilitated requirements gathering sessions with cross-functional teams to ensure the platform's modularity and scalability met evolving market demands
- Managed cross-chain bridge and staking DApp integrations

Tech Stack: ROR NodeJs ReactJs Postgres

Digital Wallet Application - Tabuk

Digital Documentation is an application created exclusively for the Saudi government, concentrating on the Tabuk region. It's a Blockchain-based app for issuing and storing citizens' critical documents, utilizing IPFS for decentralized storage.

- Conducted user needs assessment for non-technical users, leading to a 30% increase in document accessibility. Assessed project risks and suggested mitigation strategies for data security in IPFS storage

Shido DeFi Ecosystem

Shido is a decentralized finance (DeFi) project offering innovative cross-chain solutions for seamless and secure cryptocurrency transactions.

- Collaborated with cross-functional teams to develop and refine product specifications for Shido's cross-chain solutions, enhancing interoperability and user experience.
 - Conducted in-depth market research to identify emerging trends in the DeFi space, directly influencing Shido's strategic roadmap and product offerings.
-
