SUMMARY

Product Manager with 5+ years of experience building Web3 infrastructure, digital asset platforms, AI-powered products, and financial technology solutions. Led the launch of 50+ products across blockchain ecosystems, trading platforms, tokenization protocols, healthcare applications, and enterprise software. Owned product strategy and delivery for infrastructure platforms supporting 82 protocol customers, 53K+ wallets, 250 validators, and \$250M+ TVL. Experienced in translating complex technical systems into scalable products that drive adoption, revenue growth, and operational efficiency.

CORE COMPETENCIES

Product Strategy | Product Discovery | Roadmap Development | Stakeholder Management | GTM Strategy
Blockchain Infrastructure | RPC Infrastructure | Validator Systems | Tokenomics | Governance
Digital Assets | RWA Tokenization | Trading Platforms | Wallet Infrastructure | DeFi
AI Product Development | LLM Evaluation | Prompt Engineering | AI Automation | Cross-Functional Leadership

PROFESSIONAL EXPERIENCE

Product Manager

Jun 2021 - Present

[Antier Solutions](#)

- Led product strategy and delivery for 50+ products across Web3 infrastructure, digital assets, tokenization platforms, trading systems, AI applications, and enterprise software.
- Managed product engagements for 25+ clients and contributed to blockchain ecosystem initiatives valued at up to \$1.5M.
- Acted as Lead Product Manager across a team of 12 Product Managers and Product Owners, driving alignment across 120+ contributors including engineering, DevOps, QA, design, support, and product teams.
- Managed an active portfolio of 3 concurrent products, balancing product strategy, roadmap execution, stakeholder management, and go-to-market planning.
- Launched Instanodes, a multi-chain infrastructure platform supporting RPC endpoints, Node-as-a-Service, Validator-as-a-Service, Rollup-as-a-Service, appchains, and dedicated infrastructure across 50+ blockchain networks; defined its product strategy, roadmap, PRDs, pricing research, service packaging, and launch plans, supporting adoption by 82 protocol customers including exchanges, wallets, and decentralized applications.
- Introduced Dedicated Clusters and One-Click Private Blockchain Deployment services, contributing to \$250K+ quarterly recurring revenue from active infrastructure contracts.
- Led product strategy for Blockmaze, a Layer 0 RWA tokenization ecosystem supporting tokenized gold, bonds, and equities through governance-driven issuance workflows.
- Defined DAO governance, issuer onboarding, investor onboarding, KYC/KYB verification, and token issuance requirements across India, UAE, and US markets.
- Delivered spot and futures trading platforms, wallet infrastructure, liquidity provisioning solutions, staking systems, and digital asset products across multiple blockchain ecosystems.
- Facilitated discovery workshops, stakeholder interviews, solution consulting, product demonstrations, and proposal development throughout the product lifecycle.

Product Owner

Oct 2022 - Mar 2025

[SireChain \(Antier Affiliate\)](#)

- Owned product strategy, roadmap planning, backlog prioritization, and release delivery for a Layer 1 blockchain ecosystem spanning staking, governance, wallets, validator infrastructure, and chain abstraction.
- Defined tokenomics, staking mechanisms, validator reward distribution, governance frameworks, and ecosystem participation models for mainnet launch.
- Led cross-functional delivery across protocol, frontend, backend, DevOps, and QA teams, driving execution from testnet through mainnet deployment.
- Contributed to the launch of a blockchain ecosystem that reached 53K+ mainnet wallets, 250 validators, \$250M+ TVL, and 10M+ transactions within the first month.
- Coordinated security audits, exchange listings, oracle integrations, infrastructure partnerships, legal compliance initiatives, and ecosystem expansion activities.

- Authored whitepaper sections, technical reports, product documentation, release communications, and go-to-market content for ecosystem growth.
- Represented product strategy during investor presentations, partnership discussions, developer onboarding programs, and community engagement initiatives.

Research Analyst
Sanghvi Consultancy

Oct 2020 - Mar 2021

- Conducted market research, competitive analysis, and business process studies across insurance and financial services sectors.
- Automated operational workflows and reporting processes using Excel-based systems.
- Supported business growth initiatives that increased client acquisition by 4%.

PROJECTS

Instanodes | Web3 Infrastructure Platform

- Multi-chain infrastructure platform supporting RPC endpoints, Node-as-a-Service, Validator-as-a-Service, Rollup-as-a-Service, and dedicated blockchain infrastructure.
- Expanded platform support to 50+ blockchain networks and helped secure 82 protocol customers.
- Contributed to \$250K+ quarterly recurring revenue through infrastructure services and enterprise contracts.

Blockmaze | Layer 0 RWA Tokenization Ecosystem

- Governance-driven tokenization ecosystem supporting gold, bonds, equities, and other real-world assets.
- Designed DAO governance, issuer onboarding, investor onboarding, KYC/KYB workflows, and asset lifecycle management.
- Supported tokenization initiatives across India, UAE, and US markets.

Vuelo | GenAI Healthcare Assistant

- Led product ownership for a GenAI-powered healthcare platform focused on personal health management.
- Evaluated GPT, Claude, Grok, Llama, and Amazon Bedrock for healthcare AI workflows.
- Designed conversational UX, guardrails, escalation paths, and safe-response frameworks.

TOMI | Decentralized Hosting & Storage Ecosystem

- Led product planning for a decentralized hosting and storage ecosystem focused on DePIN and developer infrastructure.
- Designed workflows for infrastructure provisioning, resource monitoring, billing, and platform management.

TECHNICAL SKILLS

Product Management: Product Strategy, Product Discovery, Roadmap Development, Backlog Prioritization, PRDs, FRDs, User Stories, Agile Delivery

Blockchain Infrastructure: RPC Infrastructure, Node Infrastructure, Validator Infrastructure, Staking, Governance, Tokenomics, Chain Abstraction, Interoperability, Rollups, Appchains

Digital Assets & FinTech: RWA Tokenization, DeFi, Wallet Infrastructure, Spot Trading, Futures Trading, Liquidity Provisioning, Digital Asset Exchanges, Payment Systems

Artificial Intelligence: Generative AI, LLM Evaluation, Prompt Engineering, AI Product Development, Conversational UX, AI Automation, Agentic Workflows

Tools: Jira, Confluence, Figma, Miro, Postman, Excel, Google Analytics

CERTIFICATIONS

- Product Management with Generative & Agentic AI, BITS Pilani (2025-2026)
- Certified Business Analysis Professional (CCBA), IIBA
- NISM Equity Derivatives Certification
- Blockchain Development & Product Planning

EDUCATION

Bachelor of Commerce (Honours), Entrepreneurship

Global Centre for Entrepreneurship & Commerce
