SUMMARY

Product Manager with 5+ years of experience shipping Web3 and AI-powered products for Layer-1 ecosystems, DeFi protocols, and DePIN networks. I collaborate with engineering, design, and protocol teams to turn complex blockchain workflows into simple user and developer experiences. I have led multi-team roadmaps, developed high-throughput blockchain systems (100M+ transactions), and launched features for wallets, bridges, staking, and developer tools. Familiar with GenAI, including prompt design, LLM-assisted support flows, and AI for product discovery. Skilled at balancing technical depth with practical product decisions.

PROFESSIONAL EXPERIENCE

Antier Solutions | Chandigarh, IN

Jun '21 - Present

Product Manager

- Own end-to-end product delivery for Web3 platforms, decentralized finance applications and crypto exchanges. Designed **roadmaps and planned backlogs** across multiple development areas (protocol, backend, wallet, DevOps).
- Led multi-team execution across protocol, backend, DevOps, and wallet teams (120+ total), ensuring aligned roadmaps and coordinated releases across multiple decentralized applications.
- Worked on tokenomics models and TGE planning with partner ecosystems, shaping incentive design and user acquisition strategy for public launches.
- Collaborated closely with UX and research teams to create simplified flows for **trading, liquidity, and collateral operations**.
- Collaborated with security teams to integrate **audit partners** (CertiK, Hacken) into milestones, ensuring releases met protocol, compliance, and safety expectations.
- Collaborated with protocol engineering teams working across Cosmos SDK, Substrate, Hyperledger, and Corda architectures to define product expectations and user-facing behaviors.
- Implemented **Feature Flagging** and CI/CD pipelines to increase deployment frequency from bi-weekly to daily.

Sirechain (Antier Affiliated) | Remote

Oct '22 - Mar '25

Product Owner

- **Managed backlog** and delivery for ecosystem products: staking, governance, bridge, wallets, and developer tools. Breaking down multi-month epics into clear, testable user stories.
- Led the development & launch of the layer 1 blockchain, achieving over 100+ million transactions in the first month, built on a Rust-based chain architecture.
- Contributed to cross-chain architecture discussions and **designed UX flows** for bridging/staking that simplified complex protocol operations for retail users.
- Represented product during ecosystem **demo calls, investor sessions**, and developer onboarding walkthroughs.
- Improved sprint velocity (~20%) by providing clear acceptance criteria, refining stories, and aligning on definition of done.

Sanghvi Consultancy | Ahmedabad, IN

Oct '20 - Mar '21

Research Analyst

- Automated client database processes, improving operational efficiency using Excel-based workflows.
- Elevated website traffic, social media engagement, & **conversion rates through the strategic implementation of SMM & SEO strategies using Google Analytics**
- Formulated a targeted plan to acquire new clients, resulting in a 4% increase in the client base

KEY SKILLS

- Product Strategy | Roadmap Development | Multi-Tasking | Team Collaboration | Feature Prioritisation | Scrum
- Design Oriented | Market Research | Problem Solving | Client Consultation | Prototyping | Product Delivery

TECHNICAL SKILLS

- **Tools:** MS Excel, Google Analytics, Jira, Confluence, Figma, Miro, Postman
- **Blockchain:** EVM, Substrate, Cosmos, Evmos, Geth, Hyperledger, Corda.
- **Web3:** Chain abstraction, DePIN, RWA, ZK & Rollup Concepts, Smart Contract Wallets, Tokenomics Modelling, DeFi.

PROJECTS AND PORTFOLIO

- **Qubetics:** *Layer-1 Blockchain (Chain Abstraction + DePIN)*
 - Defined product flows for chain abstraction, validator roles, staking logic, and early dVPN features.
 - Worked with blockchain devs to translate technical constraints into intuitive UI behaviors and safe-guard checks.
 - Contributed to tokenomics modeling, validator incentives, and decentralized governance.
- **Vuelo:** *GenAIPowered Healthcare Assistant (AI + HealthTech)*
 - Gathered & refined requirements with external & internal stakeholders; prepared FRDs, flows, and sprint plans.
 - Evaluated multiple AI model options and fine-tuned LLMs with curated medical context to reduce hallucinations and improve reliability.
 - Designed conversational UX, safe-response patterns, and fallback logic to handle sensitive health topics responsibly.
- **Tom DePin Ecosystem:** *Decentralized Hosting & Storage (DePIN)*
 - Designed dashboard UX for usage tracking, billing, developer APIs, and lifecycle management.
 - Conducted competitive analysis and positioning strategy for decentralized hosting offerings.
- **BlockDAG:** *DAG based blockchain | Mining Mobile Application*
 - Reworked onboarding and mining UX flows, contributing to a ~35% increase in app downloads after v2 release.
- **Vine Labs:** *Layer 0 interoperable ecosystem | Metaverse*
 - Built modular cross-chain functionality for metaverse applications, enabling platform scalability

EDUCATION

Global Centre For Entrepreneurship & Commerce	Jaipur, IN	Mar '17 - Apr '20
Bcom. Honors Entrepreneurship		
Subodh Public School	Jaipur, IN	Mar '15 - Apr '16
12th (Senior Secondary)		
Subodh Public School	Jaipur, IN	Mar '14 - Apr '15
